Professional Summary

A hard working and driven individual who is organised and reliable. Matt is a quick learner and comfortable working both as part of a team and independently. He is focused, good under pressure and has excellent problem solving skills. Matt enjoys working on developing his skills through client work for small businesses and hobby projects. He has a keen interest in broadening his knowledge of different technologies and languages.

Professional Experience

Comply365
Front End Software Engineer | February 2024 - Present
- Working closely with the design team to create and maintain a design system used across multiple React projects with a Storybook integration.
- Creating and implementing core components including a new rich text editor, file tree viewers and reusable grid components.
- Maintaining and developing new features on an internal dynamic form engine and library.
- Developing a new modern PDF builder using React 19, a Java backend and Playwright.
- Contributing to new product features that involved developing across multiple services written in Java, Node.js and Typescript.
- Maintaining and updating an E2E test suit written in Java with Selenium that tests API and frontend applications.
- Creating regular releases across multiple microservices using Ansible for Kubernetes orchestration.
- Joining code reviews and peer-programming with other developers and junior developers.

Toolstation
Software Engineer | June 2022 - February 2024
- Maintaining and integrating new features into the company's EPOS React system that is run in 500+ stores across the country.
- Creating new endpoints in Laravel API's to integrate new features into the retail Toolstation website and EPOS system.
- Co-leading on a new project for internal stakeholders using the latest technologies and principles including React, Next.js and Tailwind.
- Leading an upgrade of the EPOS system from React 15 to 18 and Node 8 to LTS.
- Running deployments of API's and client apps using GCP Kubernetes and Puppet.
- Actively participating on the 'On call' rota on a regular basis, acting as first contact for infrastructure and engineering issues.
